Of the increase, however \$4,165,90, arose under contracts adopted before the act of consolidation, and \$50,000 has been made by the unding of the former floating debt. The c with the cash now in the treasury reduce the actual amount of increase under the present city government to \$1,174,000.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |  |  |

# The Commercial Times.

## COMMERCIAL EPITOME.

FRIDAY NIGHT, May 30, 1873.

According to act of our State Legislature to day is a close holiday, known as Decoration Day, so that the principal commercial centres are closed, and business generally suspended. Trade matters have presented few new features of moment, and the fluctuations in prices of leading staples have been slight. On the whole, however, some improvement of tone and confidence may be reported. The weather has become very fine and seasonable for crops, the temperature changing suddenly from almost winter cold, with blankets and fires in requisition, to summer, with the thermometer well up in the "eighties." We have reported this week the suspension of a number of houses, combined for the purpose of controlling the lumber trade, and having extensive ramifications in the Northern and Western states, and in Canada, but it seems to have exerted no influence beyond those immediately interested. The monthly coal sale on Wednesday went off at higher prices, but the closing prices were the lowest of the sale.

Provisions have shown some decline, and the business has been mainly in pork and lard. New mess pork sold to a fair extent on the spot at \$16 75@\$17, and old mess at \$16 25; new mess for June at \$16 621, and for July at \$17 25; but there was subsequently a decline to \$17 for the latter month. Lard has been fairly active; prime Western has sold at 9 1-16c. for May and June, 98c. for July, and 9 9-16c. for August; with kettle rendered for June at 91c. Bacon has been quiet and lower; long clear being now quoted at 81@81c., and 9c. for short clear for early delivery. Other cut meats have been quiet; dry salted shoulders were quoted yesterday at 74c.; there has been some business in short cut dry salted hams at 11c.; in pickled hams a small business was reported at 111c., and light smoked hams, in bulk, at 131c. Beef has been in limited demand. Butter has continued to decline under free receipts. Cheese has been in good demand for export, and as high as 15%c. has been reached, but yesterday 15%c. was regarded as a full price.

Freights have been less active, and rates have receded. The delay in the arrival of grain by canal, and the knowledge that less corn than usual is coming forward, have had a depressing influence upon grain rates, and for May shipments a material decline has been submitted to. A speculation in petroleum has also limited the engagement of vessels to load with that staple. Engagements for Liverpool have included large lots of cheese at 50s, with some bacon at 40s, and yesterday parties having room for grain offered to relet the same at 8½d for corn or 9d for wheat. To London, by sail, wheat at 9½d. For Bristol, wheat at 10½d by sail and 11½d by steam. A large bark to Glasgow at 6s 9d for grain and 2s 9d for flour, and another large bark to Cork for orders at 7s 7½d. To-day there was more steadiness, with grain to Liverpool by June steamers at 9s 9½d. A large bark to Hamburg with grain at 8s, and a small one to Penarth Roads at 7s 6d.

Refined petroleum has advanced to 20c. on the spot, and 20½@ 20½c. for the early future, in bbls., with cases quoted 25½@26c.; crude has been subject to speculation at "the Creek," and is higher at 9@9½c. on spot, and 9½@9¾c. for June delivery, in bulk. A considerable sale of city naptha has been made at 11½c. in bbls.

Strained rosin has been more active for export, with prices higher at \$3 20@\$8 25. Spirits turpentine, after selling at 46c., advanced and closed at 46½@47c. Tallow has been more active at 8½@9c. for good to prime. Whiskey was dull until yesterday, when a decline to 93c. led to a large business. The sale at 43c, in bond, noted last week, was alcohol. Oils have been in fair request, with sales of crude sperm at \$1 50, and choice lard oil at 80c. Hides and leather have been firm and fairly active. Metals have been dull, but the only marked change in prices is a decline in tin plates, which sold early in the week at \$12 37½ gold, charcoal tin, \$9 37½, gold, for coke tin, and \$10 25 gold for charcoal terne.

The market for Kentucky leaf tobacco has been steady, but hardly so active, the sales for the week aggregating only 500 hhds, of which 400 hhds for export. Prices have remained steady; new crop lugs 7@Sc., leaf 9@14c. Seed leaf has also been less active, but prices have ruled steady; sales have been: crop of 1870, 100 cases sundries at 9@10c.; crop of 1871, 500 cases Connecticut at 45@55c.; crop of 1872, 150 cases sundries on private terms. Spanish tobacco was less active, but prices were rather tending upward; sales 400 bales Havana at 80c.@\$1 05, and 50 bales Yara on private terms. Manufactured tobacco dull.

Exports of Leading Articles from New York.

The tollowing table, compiled from Custom House returns, shows the exports of leading articles from the port of New York since January 1, 1873, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show total values, including the value of all other articles besides those mentioned in the table.

COTTON. FRIDAY, P. M., May 30, 1873.

By a recial telegrams received to-night from the Southern ports we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, May 30. It appears that the total receipts for the seven days have reached 30,006 bales against 31,044 bales last week, 41,031 bales the previous week and 43,770 bales three weeks since, making the total receipts since the first of September, 1872, 3,410,987 bales against 2,653,235 bales for the same period of 1871-72, showing an increase since September 1, 1872, of 757,752 bales. The details of the receipts for this week (as per telegraph) and for the corresponding weeks of the five previous years are as follows:

| Received this week at- | 1873.          | 1972.          | 1871.                | 1870.                 | 1869.               | 1868.        |

From the foregoing statement it will be seen that, compared

with the corresponding week of last season, there is an increase in the exports this week of 42,954 bales, while the stocks to-night are 93,164 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to May 23, the latest mail dates.

The market the past week for spot cotton has been quiet and prices without quotable change. It may be noted, however, that the better grados—low middling and above—are in but limited supply, and to purchase good lines of them would not be an easy matter except at some advance on nominal quotations; but of grades below low middlings the supply is ample, prices are in buyers' favors, and no considerable quantity could be marketed at quotations. Yesterday the close was quiet, with the demand chefly on spinners' account. To day being a close holiday, the exchange was not opened. For future delivery business was moderate and the fluctuations trilling up to the opening of Wednesday. On that day notices for delivery on June contracts were expected to have been very freely given; but they were not, and the conviction was thus strengthened that the present crop had been largely oversold. The reports from the gold market also caused some upeasiness among parties who were under contract for delivery the next three months, and they took the precaution to anticipato their wants. The result is shown in the difference between opening and highest prices that day, low middling for caused some upensiness among particles and cleivery the next three months, and they took the precaution to anticipate their wants. The result is shown in the diff-reace between opening and highest prices that day, low middling for June opening at 18 13-32c and closing at 18 1-16c, and for July and August opening at 18 21-32c and closing at 18 13-16c and 18 25-32c respectively; but after 'Change a portion of the advance was lost. The next crop was dull and the prices paid among the lowest of the week. Yesterday, however, there was another reaction, when the improvement was especially marked in the deliveries of the next crop, though without much activity. The market is in a very sensitive condition, as it is largely overseld and there appears to be a growing indiaposition to be short any longer. The total sales of this description for the week are 53,850 bales, including — tree on board. For immediate delivery the total sales foot up this week 6,297 bales, including 3,039 for export, 3,128 for consumption, 130 for speculation, and — in transit. Of the above 270 bales were to arrive. The following are the closing quotations:

WEATHER REPORTS BY TELEGRAPH.—Our weather reports to night are scarcely as favorable as given last week. Tee much rain is the general complaint. Not that we suppose any damage has been done; the only result of the rain thus far has been the rapid growth of grass, and the difficulty, therefore, of keeping the fields clean. A succession of clear, dry days would soon remove this unfavorable condition. At New Orleans the weather has been much the same as last week; they are having too much rain, there being heavy showers, with rain more than half the week, the weather being warm and sultry. Our Mobile dispatch states that they have had a continuation there of the warm, sultry, wet weather of last week, with rain more than half the week; the grass is said to be growing so fast as to be troublesome, and hence the reports with regards to the crop are less favorable. Too much rain and the farmers complaining of grass, with rain more than half the week, is also to the crop are less favorable. Too much rain and the farmers complaining of grass, with rain more than half the week, is also the contents of our Moutgomery telegram. At Selma very similar facts are reported as to the weather, but our correspondents add that the cotton plant looks strong and healthy, and is developing promisingly. Our telegram from Macon states that it has rained there two days, but also adds that a good stand of cotton has been secured. At Columbus it has rained three days. At Augusta they have had one rainy day, with a slight hail storm yesterday, which did but little damage. At Charleston it has been warm and dry all the week, with the exception of light showers, and the crop is improving in condition. They have had rain on five days at Memphis, and on one day an unusually severe storm, with the at Memphis, and on one day an unusually severe storm, with the rest of the week cloudy; grass is becoming troublesome. At Nashville it has rained nearly every day of the week.

CONSUMPTION OF AMERICAN COTTON TO NOVEMBER 1ST.—In our item last week with this heading we intended to have stated that the figures given in it for stock held by English spinners and their weekly consumption were the estimates of the leading Liverpool brokers and not our own, and were only used and not Liverpool brokers and not our own, and were only used and not adopted by us. Something to that effect was inserted with regard to consumption, but as to spinners' surplus stocks omitted. Our own views on this latter point are well known, and were fully expressed in the CHRONICLE of February 15th. Our only object in the item in question was to show that if our crop reports continued to be favorable, even on the Liverpool basis of consumption and their estimate of spinners' stocks, there would be a surplus of American cotton. As to the actual stocks held by English spinners, we may have something to say next week.

OUR VISIBLE SUPPLY STATEMENT .- We expect to begin next week to furnish our readers with a new table of visible supply, the most complete which has ever been published. The endeavor has been to obtain a statement which would reflect the exact amount of cotton in stock and affoat of each kind each week. This has always been our aim, but we have hitherte failed to attain it. The arrangements which we have now completed will, we think cover the entire field; and as we are promised the corresponding figures for the two previous years, a comparative statement of much usefulness will, we trust, be the result.

BOMBAY SHIPMENTS.—According to our cable dispatch received to-day, there have been 37,000 bales shipped from Bembay to Great Britain the past week and 2,000 bales to the continent, while the bales. The movement since the first of January is as follows. These are the figures of W. Nicol & Co., of Bombay, and are brought down to Thursday, May 29:

|      | Shipme  | nts this w | aek to- | -Shipme  |         |         |           |
|------|---------|------------|---------|----------|---------|---------|-----------|
|      | Great   | Con-       |         | Great    | Con-    |         | Week's    |
|      | Britain | tinent.    | Total.  | Britain. | tinent. | Total.  | receipts. |
| 1873 | 37,000  | 2,000      | 39,000  | 510,000  | 137,000 | 647,000 | 35,000    |
| 1972 | 15,000  | 10,000     | 25,000  | 469,000  | 215,000 | 684,000 | 32,000    |
| 1871 | 50,000  | 17,000     | 67,000  | 401,000  | 219,000 | 620,000 | 58,000    |

From the foregoing it would appear that compared with last year there is an *increase* this year in the week's shipments from Bombay to all of Europe of 14,000 bales, and that the total movement since Jan. 1 shows a decrease in shipments of 37,000 bales compared with the corresponding period of 1872.

VISIBLE SUPPLY OF COTTON MADE UP BY CABLE AND TELE-GRAPH .-- By cable we have to night the stocks at the different European ports, the India cotton affost for all of Europe, and the American affost for each port as given below. From figures thus received, we have prepared the following table, showing the

Below we give all news received, during the week, of disasters to vessels earrying cotton from any port of the United States:

to vessels earrying cotton from any port of the United States:

Steamship Memphus, from New Orleans for Liverpool, remained on the bar, South West Pass, May 30, where she has been for twenty-eight days past. She will return to New Orleans after being got off.

Steamship Alabama, from New Orleans after being got off.

Steamship Alabama, from New Orleans after being got off.

Steamship Alabama, from New Orleans may 17, for Liverpool, with a valuable cargo, remained on the bar, at Pass s Potre May 24.

A bale of cotton was picked up April 22, in int 35 N, ion 68 W, which had apparently been slightly burned. It had no marks on it, and appeared to have been in the water a long time, as it was covered with barnacles.

Varuna (Br), from New York for Liverpool, taken into St. Thomas, dereliet, remained May 15. Captain Berry, of the ship Rowactree, which vessel picked up the Varuna, and put a crew on board, had arrived at St. Thomas, with fall powers of attorney from the different parties interceted in the vessel in England. Captain Hillon, repressenting the cargo insured in the United States, was also there.

Try (Nor.), from Galveston for Liverpool, before reported by cable, got ashore at 4 AM. May 11 during a thick fog, at Penrhosmilo, two miles southward of the Sonth Stack, but was lowed off at high water and into the New Harbor, Holyhead, where she was beached, waterlogged. She was towed into the Old Harbor 12th, and commenced discharging cargo on the wharf 14th to be taken to Liverpool. She was being dismantled.

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 117% and 118%, and the close was 118%. Foreign Exchange market is quiet. The following were past week between 117% and 118%, and the close was 118%. Foreign Exchange market is quiet. The following were the last quotations: London bankers', long, 108½@108%; short, 109½@108%, and Commercial, 107½@108%. Freights closed at 5.16d.@\$d. by steam and 5.16d.@\$d. by sail to Liverpool, 1c. gold by steam and 1c. by sail to Havre, and \$d. by steam to Hamburg.

#### BY TELEGRAPH FROM LIVERPOOL .-

LIVERPOOL. May 33-5 P. M.—The market opened dull, and closed quiet to-day, with sales foeting up 10,000 bales, including 2,000 bales for export and speculation. ## BREADSTUFFS.

FRIDAY P. M., May 30, 1873.

The course of the flour market has been steadily towards lower prices during the past week, especially for the lower grades from Spring wheat, of which receipts have been liberal, attended by a considerable pressure to sell. Common superfine has sold down to \$5 75; for fair No. 2, \$4 50 was the best bid; common extra Western has been sold below \$7, and a good line of 1,000 bbls. extra State sold at \$7 10; medium grades have also declined, but not so much or so generally as the lower grades. The better grades, including family flowers, have been firm, but very quiet. The mill streams are now in good condition, and the production of flour, of such grades as the quality of the wheat available will admit, is on a very large scale. To-day the market was depressed with common extras quoted as low as \$6 75.

The supply of wheat on the spot has continued small, and it has been wanted to fill freight engagements; prices have consequently ruled steady, though the purchases have been only such as buyers have been compelled to make. For arrival, prices have declined, with sales for delivery early in June at \$1 57 for No. 2 Chicago, and \$1 60 for No. 2 Milwaukee, with delivery up to the 18th of June at \$1 58 for No. 2 Milwaukee. The business on the spot has been mainly at \$1 58@1 60 for No. 2 Chicago; \$1 62 @1 64 for No. 2 North West and Milwaukee, with some No. 1 at \$1 69@1 70, and No. 3 at \$1 50@1 55. Latterly there has been more demand for Winter wheats, white especially being in request. The receipts of Spring wheats continue large at the Western markets, and of Winter wheat there is more coming forward. To-day, Spring wheat was about steady, with sales on the spot of No. 3 Milwaukee at \$1 55; No. 2 Chicago, North West and Milwaukee at \$1 60, \$1 62@1 64, and for arrival, first half of June, No. 2 Milwaukee at \$1 58; but Winter wheat was lower, and 20 car loads of amber Michigan sold at \$191, which is a material decline from previous sales.

Indian corn has been in but moderate supply, while the demand has been each day more urgent; there is consequently some advance in prices, especially of good Western mixed and yellow. It will be seen that the receipts at the Western markets last week were only a little more than half as large as in the correspending period last year, and the movement towards the seaboard continues to be on a greatly reduced scale. Yesterday good to prime new Western mixed sold at 631@641c., with yellow at 65@66c. To day there was a further advance, with sales of prime new yellow at 67c., and fair to prime new mixed at 64@66c.

Rye has centinued in demand for the Continent, with several cargoes sold at 96@98c., including Canada to arrive at 97c. in bond.

Barley remains dull and nominal, the malting season being over. Canada peas are lower, with a better supply in prospect.

Oats have been fairly active, and prices about steady, new mixed selling towards the close at 50@52c., as to quality, and white 55@57c., with some choice lots at 58@59c. To-day the market was dull and depressed, except for white.

The following are closing quotations:

^{*} Estimated. At Chicago and Milwaukee, at latest dates, 365,500 bushels rye.

LONDON, May 17.—Our London correspondent furnishes the following Continental grain reports which will show that the firmness of the wheat trade is not confined alone to Great Britain:

ROTTERDAM--Wheat has sold readily, and the late advance in prices has been well supported.

NAPLES.—Owing to a demand from France, and to complaints from some of our growing districts, red Barletta wheat has realized advanced prices.

ANTWERP.—The wheat trade is firm, and extreme rates are demanded both for red and white qualities of produce. In other grain there is no material change.

AMSTERDAM.—Wheat, for immediate delivery, is quoted at late prices, but is cheaper for Antumn delivery.

Schiedam.-Rye is in demand, and the quotations have had an upward tendency.

PARIS.—There is no activity in the demand for flour, but prices are very firm. Wheat is more freely offered, but the demand is good, and the quotations are well supported. The holders, in fact, of the better descriptions of produce, are very firm in their mands, and buyers are compelled to meet their views. Rye is

not in active request, but prices have an upward tendency. For good barley there is an easy sale at extreme rates. Fine oats command full prices.

KONIGSBERG.-Wheat, on the spot, is firm, at full currencies: and rye is fully as dear.

DANTZIC.—There is a good demand for wheat on the spot, but chiefly for the better qualities, which have sold at rather higher prices.

HAMBURG.-The trade is firm for all kinds of grain at full quotations.

BREMEN.-The market for rye is quiet, but firm. Other kinds of grain support firmer rates.

ODESSA .- In Bessarabia winter wheat, and, in fact, the crops in general, have a very satisfactory appearance, and the farmers anticipate a yield of produce equally as abundant as that of 1866. As to quantity, it is said there can be no doubt, while the quality of the produce will depend chiefly upon the weather, during the harvesting of the crop.

ALEXANDRIA.-Transactions in wheat are restricted to the requirements of home consumers. The downward movement in beans has been checked, the supplies offering being smaller and the demand more active. In maize very little doing owing to small arrivals.

ST. PETERSBURG.-The wheat trade is very animated, and considerable business has been done on higher terms.

COPENHAGEN.—The market is firm, but without animation-The supplies offering are small, and higher prices are demanded.

#### GROCERIES.

FRIDAY EVENING, May 30, 1873.

The trade in groceries has been fair in a jobbing way during the past week, although business in all branches has been restricted by the general observance of "Decoration Day" as a holiday. The trade from first hands has been rather slow, and the aggregate distribution does not equal the expectations of dealers. It is getting to be too late for very much activity in the trade, but in view of the illiberal supply of some goods in the country it is hoped that the season will continue to a later period than usual. Sugars have undergone some changes this week, but beyond this values are without essential alteration. Teas continue depressed and arc slow of sale. Coffee is quiet but unchanged,

#### TEA.

The trade has been very dull, and the market has exhibited no important change since our last report. No further offerings have been made at auction, and it is probable that the unsatisfactory results of the sale two weeks ago will have the effect we predicted, namely preventing holders from attempting to force off sound goods upon such a market as we have had for months. current sales are confined entirely to the regular channels and, although the movement is light, prices show no further decline upon either Greens or Japans. There is less steadiness in Oolongs, and the market is irregular with few sales. The arrivals for the past week have been small, and comprise parcels of all grades. The sales from first hands for the week comprise 1,800 half chests Greens, 7,750 do. Japans and 2,500 do. Oolongs.

The receipts and x,000 do. Oolongs.

There have been no imports at this port the past week. The receipts indirectly have included 985 pkgs by stesmer.

The following table shows the imports of Tea into the United States from January 1 to date, in 1873 and 1872:

Misck. Green. Japan. Total Misck. Green. Japan. Total 1873. Atlantic ports, 1873...lbs. 11,168,859 12,236,432 7,937,275 91,342,246

Atlantic ports, 1873...lbs. 11,168,959 12,376,290 6,459,399 80,160,66

The indurect receipts at New York, principally overland receipts from San Francisco, have been 48,531 pkgs. since Jannary1, against 69,468 ast year. Imports at San Francisco from Jan. 1 to April 30, were 188,825 lbs. of China, 1,015,630 lbs. of Japan and 200 lbs. of Java tea.

#### COFFEE.

There has been a very fair call for the Rio grades, and the market has stiffened considerably although the arrivals have increased the atock somewhat. The position of the market is regarded as favorable, however, and holders are not disposed to relinquish their stock except at full figures. late Rio telegrams show a very firm tone, and give advices favorable for the maintenance of values here. The jobbing demand has been fairly active, but the sales from first hands are on a restricted scale. The transactions in the West India grades are restricted by the small supplies in first hands. Johhers hold limited amounts and are selling fair parcels at full figures with the market well sustained. East India coffees are also pretty well sold out and are held steadily at former figures. The transactions in all grades include 1,967 bags Rio ex "Foreningen," 1,000 do. ex "St. Ursula," 1,322 do. ex "R. W. Messer," 2,000 do. ex "Contest," 1,029 do. ex "Outarlo," 400 bags Java, 385 do. Laguayra, 1,522 Costa Rica, 782 Ceylon, 80 St. Domlogo, sold into consumption, and 757 do. shipped to Liverpool from first hands.

Imports the past week have included 8,022 bags Rto, per "R. W. Messer," 4,000 do do, per "Collega," 3,805 do do, per "Nornen," 3,155 do do, per "Poseidon; 7,329 nate Java, per "Thos. Fletcher; 3,604 bags Laguayra, per "St. Thomas," 346 do do, per "John Boniton," and 3,522 do sundries. The atock of Rio May 29, and the imports since Jan. 1, 1873, are as follows:

| In Bage.       | New<br>York.       | Phila-  |                   | Naw<br>Orleans. | Mobile,          | Gal-            | rotal.             |

† Also 11,370 mata.

SUGAR. The market for raw sugars has been somewhat unsettled during the week, and the husiness has not been very liberal. A moderate trade has been reported in Muscovado sugars, with sales fully equal to the receipts. Centrifugal sugars are held firmly, and are selling with fair activity. The range of quotations is the same as was last quoted, but with very little activity at the close; the position of the market is not altogether strong. The arrivals of sugar, though free, are not so large as to weaken the market particularly, although they have rendered prices rather less stable than they were last week. Refined sugars have been in fair request for the most part and show some steadiness at the close. Prices have not suffered any material change, although there has been a reduction of %c on crushed, bringing this grade down nearer the level of granulated and powdered. Softs are rather quiet, but remain at nominally unchanged figures, and the only deviations are in some of the less popular brands. The sales of raws since our last have been 4,165 hhde Cuba, 7%@8%e; 588 do centrifugal, 9%@9%e; 4,100 hoxes do, 9@9%c; 431 hhds Porto Rico. 7%@9c; 200 hhds, 25 libis clarified Demerara, 9% @10%; 1,242 baskets Batavia within the range; 50 boxes Havana.

imports at New York and stock in first hands May 29, were as follows:

| Cuba.                                                                  | Cuba. P. Rico. hhda. *hhda. 11,160 163 160,120 16,471 145.691 14.882 | Other.  | Brazil.! | Manila,&c               | Melado                  |

MOLASSES.

The trade does not pick up very rapidly, and with a pretty fair, though not excessive supply, prices are rather favoring buyers. Holders failing to see any prospects of better prices are desirous of realizing on their goods, and the arrivals of boiling Cuba are offered a fraction under last week's prices, though the same range is still quoted. The supply of Cuba, of all grades, is 2,498 hhds. There is a vety light stock of Porto Rice and English Islands in the market, the latter amounting to 131 hhds., and the former to 123 do. Sales of trade qualities are not very liberal, and low and medium grades are easier. Prime and choice qualities are still in good request and full prices are obtainable. The stock of domestic has run down to 1,509 bbls., and prices are fully sustained as last quoted, with a moderate call for lots. The sales are 264 hhds., 11 tes., as last quoted, with a moderate call for lots. 7 bbls. Porto Rico, 52%c; 200 do. in lots. 45@60c; 132 do. Barbadoes, 40c; 240

Cuba Muscovado, 30c, and 400 bhis. New Orleans within the range. The receipts at New York, and stock in first hands May 29, were as follows:

### THE DRY GOODS TRADE.

FRIDAY, P. M., May 80, 1878.

The hot weather has created a call for the lighter descriptions of dry goods, and there is rather more doing in a jobbing way. The trade in first hands continues to lack animation, and the market is daily becoming more and more unsettled. The present irregularities in prices would suggest that the values current earlier in the season were upon a thoroughly fictitious basis, or else the current decline is likely to bring about a range of values unwarrantedly low. Jobbers were chiefly instrumental in starting the reduction, by cutting prices for the purpose of helping trade. Agents were slow to follow on goods that were of a staple character and well sold up, but their rates have since been revived as rapidly as stocks began to accumulate. There is every Indication now that prices will soon get down to "hard pan," and from appearances, a point is likely to be reached which will laduee buyers to lay in their stocks of staple cottons early in the season for the Fall trade. The outlook on woolens is still rather unfavorable, and the market is wholly destitute of buoyancy. The finances of the trade do not appear to be in a condition to cause great uneasiness, though collections are somewhat slow.

DOMESTIC COTTON GOODS .- The tendency of the market during the past week has been toward a reduction of values, and a decided break has occurred in the prices of bleached fabrics. Medium and fine shirtings have nearly all been reduced, and the best grades are expected to follow, as they are now selling from jobbing stands at lower rates than the agents are quoting. This break in prices has been looked for for some time past, and therefore occasions no surprise or excitement. It may possibly increase sales to a slight extent, but no material improvement is looked for, as from this time forward purchases are likely to be restricted to about actual requirements. Brown cottons have sold in a very moderate way thus far, and remained at about previous figures, though there is some irregularity in the jobbing quotations. There has has been a break in prices on some lines of colored fabrics, this week, and we quote a few brands of both stripes and ticks at a reduction. New styles of stripes remain at about old figures, and the reduction is mainly on the less desirable patterns. Prints are dull, sales being restricted to the job offerings, which are selling at very favorable rates. Few quotable changes have occurred in these goods. Lawns and percales are meeting ready distribution, and all of the principal brands are well sold up.

DOMESTIC WOOLEN GOODS,-The demand for fancy cassimeres and coatings in light weights suited to the current tailoring wants is small, and the sale of spring goods is pretty well over. Jobbers still find market for a few goods, but the aggregate sales are insufficient to establish values and quotations are very irregular. There has been a considerable business done in heavy weight low and medium priced cassimeres for clothiers' uses, and at the present range of prices these buyers show a readiness to operate with some freedom. Faced goods are not especial'y active, but the market remains nominally steady in the absence of business. Other woolen fabrics are dull, and without essential change.

Foreign Goods,-The demand for all classes of imported fabrics is very light, though the warm weather is creating a more active inquiry for thin dress fabrics, and lawns and linen suitings are moving with considerable activity. Grenadines have also been inquired for more freely, and other thin effects meet ready sale to the interior and local retail trade. There have been liberal offerings of all foreign fabrics through the auction houses, but sales are somewhat difficult to effect, as the retail distribution throughout the country generally is rather slow, and dealers are very cautious about their purchases.

We annex a few particulars of leading articles of domestic manufacture our prices quoted being those of leading jubbers:

THE RAILWAY MONITOR.

THE RAILWAY MONITOR.

This is a Journal of general Railroad Intelligence, iotended to supplement the brief railroad news contained in The Chronicle, and published monthly on or about the fifteenth of each month.

Subscription price per year (including a file cover the first year). \$4 60

The Chronicle and Monitor will be sent to subscribers until ordered discontinued by letter. Postage is paid by the subscriber at his own post-office.

WILLIAM B. DANA \$ O., Publishers,
JOHN G. FLOYD, JR. \$79 and 81 William Street, NEW YORK.

Post Office Box 4,592.

Subscriptions and Advertisements will be taken in London at the office of the Chronicle, No. 5 Austin Friars, Old Broad street, at the following rates:

Annual Subscription to the Chronicle (including postage). £2 2s.

Monitor "" 0 18s.

Chronicle and Monitor together. 2 16s.

Advertisements, in either Journal, is, per line each insertion; if ordered for five or more insertions, a liberal discount is allowed.

The Publishers cannot be responsible for Remittances nnless made by Drafts or Post-Office Money Orders.

The Aneat file for holding current numbers of the Chronicle is sold at the office for 50 cents; postage on the same is 20 cents. Volumes bound for subscribers at \$150.

The first and second volumes of the Chronicle are wanted by the publishers.

# THE RESERVES OF THE BANKS.

The Summer torpor has fairly taken possession of Wall Street, and some of the banks are yielding to the temptation to make time-loans running into October, November, and even longer. The lending institutions have, however, made such ample profits during the past half year that they ought to be content now to adopt a conservative policy, even if they thereby sacrifice some possible gains. And one of the fundamental requisites of a conservative safe policy is the strengthening of the reserves. Our bank officers will do well to look over some of their old reports and observe how much more ample a few years ago were the reserves which they used to keep than these of more recent times.

During the last three or four years the average reserves have been gradually sinking, and as a consequence of this and other changes New York is losing its old predominance as the great centre of the National banking system. We

do not wish to attach undue importance to the depression of the reserves in this point of view. But there is little doubt that the notorious defect and the frequent exposition by the press of the names of the defaulting banks, with their low averages, has a tendency to help the other causes, which we have often discussed, leading country banks to redeom elsewhere than at New York, and to open accounts especially in such banks as pay a heavy rate of interest on deposits. We also admit, of course, that this decentralization of our banking system is largely due to its being founded on paper money and to the absence of effective redemption of the National Bank notes. Still the evil is made worse by every deviation of our city banks from a sound policy among which trespasses we must certainly include this mischievous weakness in point of reserves.

There are some persons who argue that the banks ought not to be compelled by law to keep any specific aggregate of reserves, but that the whole subject should be left to their judgment and discretion. This objection is brought against the National banking law, and we need not now discuss that. The 25 per cent reserve arrangement is all that we are contending for, and it is older than the National banking law. For the purposes of our argument it makes no difference whether the minimum of reserve is prescribed by law, or whether the banks agree among themselves to keep it up as was done by our Clearing-House banks from 1857 to 1865, before they went over to the National Currency system. As the banks acknowledge the necessity of holding their ful 1 measure of reserve, however, we do not see why they should object to the law which prescribes a safeguard the value and soundness of which have been so thoroughly tested and proved by experience.

If, indeed, there be any of our banks which contend that less than the legal reserve will suffice, and that to demand 25 per cent compels the banks to hold passive a part of their funds which might be active, then we must refer these gentlemen to the Clearing-House, which has thoroughly discussed this question, and settled it, after a fair and full examination of all its bearings. Again, it is said that as a well managed bank can always call on the public as fast as the public can call on the bank, therefore if its managers have been careful where they place their money they can call it in as wanted, and in the severest panic they can thus pay off their depositors as fast as the latter can demand their money, so that no reserve is needed to fall back upon. To this the answer is that banks are chartered to subserve great public interests, one of which is that in a panic, and in a multitude of other cases, the banks shall positively not be compelled to draw on the people as fast as the people draw on the banks. The recurring seasons, the changing activity or torpor of business, and many similar causes,

produce continual fluctuations, jerks, and changes in the demand for capital. The banks are placed between the borrowers and lenders to manage the distribution so as to break the force of such fluctuations, and to preserve the due equilibrium between the demand and supply. Without an ample reserve the due fulfillment of this function is impossible, and the proper amount of elasticity cannot be given to the movements of capital.

This is the explanation which has often been given of the frequent jerks and spasms notoriously disturbing the movements of the Bank of England. Its banking depart. ment has an insufficient reserve. The Act of 1844, by a well known principle, divides the bullion reserve into two parts. The note department keeps one part, and the banking department the other. The reserve of the banking department is not restricted by the Act at all. The law does not interfere with it, but allows the bank to keep as much or as little as it chooses. Three times since 1844 the bank authorities have made the mistake of letting their reserves run too low, so that the panie of 1847, 1857, and 1866 depleted the bank, and caused imminent danger of some still more appalling disaster. To meet the difficulty, a simple expedient was resorted to, which is in effect neither more nor less than the placing of a part of the note reserve of bullion in the banking department, thus weakening the one to strengthen the other. To do this the law has to be disobeyed, which forbids it. But in these three cases the Government authorized the infraction, and promised to ask Parliament for a bill of indemnity, which was passed as soon as possible afterwards. Several times it has been proposed to incorporate in the law itself some provision authorizing the needful infraction on certain well-defined conditions. The telegram yesterday in the Herald announcing an increase of 6 millions in the note circulation of the Bank of England is interpreted to refer to some such provision which Mr. Lowe, the Chancellor of the Exchequer, is reported to regard with favor. We refer to this matter now, however, not with the view to discuss it, but simply to illustrate the point we have raised as to the reserves of our own banks, which we trust will be strengthened to their old averages during the early part of the present summer.

# THE DEBT STATEMENT.

Mr. Richardson's report of the public debt for May offers satisfactory evidence that; notwithstanding the reduction in the revenue from taxation we are still keeping up a moderate liquidation of the principal. The decrease of the debt in the last month was \$3,525,282, making the total sum paid off since March 1, 1869, amount to \$368,082,539. At the same time we learn from official sources that the first 50 millions of the Syndicate loan have been successfully negotiated, and a further call for 20 millions was issued yesterday. As no country in the world has paid off so much of its public debt as has the United States, it may seem somewhat strange that the new loan drags heavily in the market, and is slow to work itself off.

We have explained the chief reasons for this more than once, and will not now repeat them. It is gratifying to know that the failure of the loan is no indication of the depression of our Government credit, which deservedly stands higher than ever before in the money markets of the world. There are no National securities except British consols and French rentes which are so well known as our five-twenties. Perhaps there are few that would form a more available basis of credit for a traveller in the distant monetary centres of either hemisphere. If the Syndicate have not done what we expected of them in regard to the rapid placing of the new five per cent loan, they have done something which few of us did expect. They have spread in the summer to hold a 20 million reserve of greenbacks

among the population of the richer and more frugal countries of Europe, a large fund of information respecting American bonds of various kinds which is destined to produce a demand by small investors hereafter, and has already begun to attract attention as an element in international finance. It is well known that Louis Napoleon was the author of this new method of placing government loans among the masses of the people, and that the force of this new expedient of fiscal statesmanship was fully developed in the great French loans of 1851, 1853, and subsequent years. In 1862 Mr. Jay Cooke, as agent of Mr. Chase, adopted a modification of the French principle of popular loans, and by means of this most powerful engine of modern finance our great war loans were raised at home at a time when Europe would not lend us a farthing. Now that we have actually paid off nearly 370 millions of the amount of our war debt, the same principle of popularizing our bonds is being extended to Europe, and the Syndicate, is entitled to the credit of opening a new market and of doing in this respect a good work which was hardly foreseen.

As we have said, the aggregate paid off from surplus taxation is 368 millions since 1869, which gives an average of 90 millions a year. If this rate of liquidation should be kept up the whole debt would be paid off by 1898, or in 24.723 years from the present time. This would bring our fiscal policy within the limits of the well-known axiom of Jefferson, that no republic should make a national debt which could not be paid, and which was not arranged to be paid, within the life time of the generation that incurred the obligation. Of course this maxim of Jeflerson's, like all other general principles, admits of exceptions; and however sound and salutary it may be as applied to ordinary debts by which republics are most frequently tempted to prodigality and corruption, it may be applied with some qualification to debts of the prodigious magnitude required for modern warfare, and to emergencies in which the struggle, as in our case, was for national unity and national existence.

No one in our times will contend that a great Republic must basely consent to be blotted out of existence, or give up its national life to every conqueror who may choose to make war upon it-no one will argue for this on the plea that war is costly, and that to be successful it would involve a public debt greater than the generation incurring it could ever hope to pay off in full. In such a case the war is for the benefit of future generations as well as for the present generation. Ought not both, therefore, to bear equitably the burdens of the war if both share alike in its fruits? These arguments are now much more frequently heard than formerly, and there is a conviction in the public mind, which is even more decided than when Congress reduced the taxes at its last session, that this country ought not to be impoverished by the payment of any more of the public debt than the one per cent sinking fund, and that if there be any surplus from taxes beyond this stipulated one per cent, that surplus should be devoted to diminishing the fiscal burdens of our citizens. Every such diminution of taxes leaves so much more money to fructify in the pockets of the people, and contributes, therefore, to accelerate the growth of the national wealth.

The reduction last month of 31 millions in the aggregate of the debt was not therefore much expected, especially in view of the heavy Treasury disbursements in May, for which the excessive appropriations of the last Congress in its closing hours are partly responsible. The currency balance is now up to \$6,065,000, and should if possible be increased to 20 millions in the next quarter. If Mr. Richardson could contrive by such a currency accumulation during the idle season, and to pour them out in the tall, he would not only establish his reputation as one of our ablest financial statesmen, but, what is still better, he would do much to prevent the anticipated return next fall of tha monetary stringency which has entailed such heavy losses on the industrial interests of the country during the last half-year.

Among the minor features of interest in the debt-statement is the payment of the certificates of indebtedness and the closing up of the currency-debt bearing-interest. This currency-debt was formerly the greater part by far of the whole aggregate. But it has been paid off by degrees, and now all that remains are the two items of \$14,000,000 Navy Pension Fund, and \$678,000 currency-fours, issued in 1870 to the states of Massachusetts and Maine, and due in 1875. Under this head of currency-debt bearing-interest we of course do not include the greenbacks which, though a currency-debt, bear no interest. These greenbacks are now down to 356 millions, as we stated last week, and the aggregate it is hoped will never undergo any further changes except, indeed, to lower figures, as their outstanding volume may be reduced with a view to resumption, and as a preliminary step toward redemption in coin.

# SHALL WE EXPORT GOLD?

Much to the surprise of our mercantile community, the Bank of England on Wednesday advanced its minimum rate to 7 per cent, and various conjectures are current as to this unexpected policy which has not yet been fully explained. Of course the first question is as to the probable effect of the change upon the financial situation here.

Although we have now arrived at a period of the financial year when the money market has usually an abundance of floating capital; and the demand, for three or four months, will probably fall below the supply, so that the rates of interest will be easy, still it is evident that if a sudden large export of gold should take place, the money market could scarcely fail to show symptoms of disturbance. The starting point, therefore, of our inquiry is whether the advance in the Bank of England rate is likely to cause such a shipment of specie.

It is premature to speak positively on this. But so far as we can learn from present indications, the 7 per cent rate does not seem to be producing much impression here-On receipt of the news of what had been done, our market rates for exchange went up to 1101 to 1101 for sight bills, the 60 days' rate being unchanged. Gold on an active demand went up to 1181, but the excitement was shortlived. There was little responsive demand for foreign bills, and gold receded slightly. The telegrams from London announcing the advance of the Bank of England gave new orders for five-twenties and other bonds, reporting the open market rates at 1 to 1 per cent below the advanced bank rate. We must await further indications and more definite evidence, before we can say, with any approach to certainty, whether the present rate of seven per cent will put a sufficiently strong pressure on our monetary system to bring on an export of gold.

As to the immediate cause of the advance, enough is known to connect it with the concentration of heavy foreign balances in the Lendon banks during the last few days. The advance is precautionary. Since the Vienna panic the excessive depreciation in continental securities has stimulated purchases on an extensive scale; and in payment immense remittances have been sent to London, which is the great International Clearing House; and the high rates of interest there paid on deposits have also tended to attract money from all parts of England to the metropolis. If

these causes of accumulation had not come into operation at the same moment with heavy indemnity payments from Paris, the natural result would have been an immediate decline in the rates of interest. But it is well known that next week \$50,000,000 are to be paid by France to Germany, and that a similar payment will follow at the beginning of every month until the unpaid balance of the five milliards has been remitted. This balance amounts to 2 milliards, or about \$400,000,000. With these heavy monthly payments in view, the first of which is due next Tuesday, the Directors of the Bank may be excused for showing some alarm when they found the banks in London placing such heavy deposits of paper to their credit on the books of the Bank of England. For these deposits constitute really an optional demand for gold, and it has been a well-known expedient often resorted to by the London banks in times of emergency to increase deposits in the Bank of England that they may strengthen themselves by controlling a larger share of its coin reserve. In May, 1866, one of these great banks is said to have deposited paper to such an amount that it could have drawn out in coin the whole of the gold reserve of the banking department on a single check. It was on this occasion that the Bank act was suspended for the last time. At a special court on Tuesday the Bank Directors determined not to wait till Thursday, their usual weekly meeting, but took action at once, and the apprehension still prevails that the balances now standing to the credit of some of the London banks are intended to facilitate prospective gold shipments to a heavy amount from England to Germany. In raising the rate to 7 per cent, therefore, the Bank Directors must be regarded as acting with prudential foresight.

Another still more important question has been raised as to whether a further advance will be made, and the authorities are said to be contemplating such a contingency as probable. It is semi-officially announced that they will act vigorously, and will put up the rate to 8, 9, or even 10 per cent by rapid steps if the drain of gold cannot otherwise be speedily brought under control. The safety and expediency of such a course has been strongly urged by eminent financial authorities. Whether this advice will be followed is, however, uncertain. It is opposed by several objections. First, it would be unpopular with the masses of the mercantile community in England; and we may well doubt whether this fact may not deter the advance, especially as a Parliamentary inquiry is agitated to stop the Bank from making such frequent spasmodic changes in its rate, and to aubstitute if possible some less mischievous and costly method of keeping up its reserve in face of such a demand as at present exists, and is always liable to arise, for exportation.

Secondly, it might be difficult for the Bank to maintain the advance of 7 per cent, and much more difficult to reach a higher point, unless it is able to carry the open market up with it. Otherwise its loans would be dimintshed, and borrowers would go elsewhere, or, as the English financiers express it, "the private securities would flow off." Now as this sacrifice of business and of profits is not likely to be volunteered by the Bank if at any moderate cost it can be prevented, and as there is no power superior to the Bank, capable of controlling its action in this matter, the Directors will be left to do as they see fit. If, therefore, the present rate of 7 per cent does not produce the desired effect, and if a further advance would cost the bank too much, it is possible that some other means will be resorted to for obtaining gold.

the great International Clearing House; and the high rates of interest there paid on deposits have also tended to attract over by an arrangement with the Bank of France, whose money from all parts of England to the metropolis. If stock of bullion was then as now, very large. Still earlier

a like object was accomplished by the purchase of two millions sterling through Rothschilds at a commission of one per cent. Another method of dealing with the evil is for the bank to refuse to discount finance paper. This policy is, however, only a palliation tending to moderate rather than prevent the drain of gold. Besides, it has probably been already adopted by the bank for some time past. Other methods have been suggested for accomplishing this purpose, to which we refer elsewhere. E ough has been said to indicate the chief difficulties which lie in the path of a further advance of the Bank of England rate; still such an advance is by no means sure not to be made.

If this pressure should be pushed to the extreme an export of gold from this side night of course be coerced, and twenty millions at the most would perhaps go abroad during the summer and fall months. The loss of such an amount of gold three months ago would have been serious. Now, however, it could scarcely cause us any trouble, and there would also be a compensation; for the same causes which produced it would perhaps check our imports, and would also enlarge the volume of our exports of produce so as to develop some wholesome changes in the balance of trade which has too long been against us, but is beginning already to be redressed.

# STOCK OF COTTON HELD BY ENGLISH SPINNERS.

The past year has been one of peculiar hardships to Eiglish spinners. Local causes, such as the high price of coal, &c., have, to be sure, contributed largely to this result, and yet the mistaken and delusive statistics of the cotton trade issued from Liverpool have been at the bottom of their losses. We took occasion early in February (Feb. 15, p. 208; Feb. 22, p. 240; and also March 8, p. 312) to indicate the true position of cotton, and the event has so fully verified our statements that there is only one point which we raised then still unadmitted, and we refer to it now because the sooner it is also acknowledged the hetter it will be for the entire trade. When we first wrote, low middling cotton for May delivery was selling at 211c, and our Liverpool friends were expecting a large advance shortly. Within a month it had declined nearly 2c, and has never since recovered to any extent except temporarily. This decline we saw was inevitable, and we clearly indicated that such was our opinion in the articles we pub'ished.

But, as we stated, there is one important point which is still in dispute, and that is as to the amount of the invisible stock now in the hands of English spinners. Liverpool brokers pretty generally put it at about 130,000 to 150,000 bales, and that has been about their figure ever since the 1st of January, An error cace made, well persisted in, if it does not become a fact, looks so much like one that the average mind does not see the difference. We demonstrated, however, on the 15th of February that this statement of January 1st could not be correct; and for one moment let us see the exact truth as then established. From the official returns of the spindles running and the pounds spun, as made to Parliament by her British Majesty's Inspectors of Factories for a series of years, and estimating from reliable data the figures for 1869 and for 1871 and 1872, we have prepared the following table:

| Year. | Spindles.  | Total Lbs.<br>Cotton Spun. | Lbs. per<br>Spindle. |
|-------|------------|----------------------------|----------------------|
| 1850  | 20,977,017 | 611,000,000                | 29 13                |
| 1856  | 28,010,217 | 856,700,000                | 30 94                |
| 1861  | 30,430,467 | 978,300,000                | 82.15                |
| 1868  | 32,000,014 | 993,489,000                | 81:05                |
| 1869  | 30.000,000 | 941.586.000                | 81 .38               |
| 1870  | 32,000,000 | 1.052,470,000              | 82 89                |
| 1871  | 33,750.000 | 1,145,435,000              | 83 94                |
| 1872  | 000 000    | 1 120 600 000              | 00.00                |

Now taking the consumption of cotton in Great Britain were therefore reduced 2,887,000 lbs., equal to 7,217 bales for the last three years as above, we arrive at the following of 400 lbs. each, not a very important reduction from

conclusions, beginning at the end of 1869 with the stocks of cotton as then reported by the Liverpool Cotton Brokers' Association, and the spinners' stock as stated by Messra. Ellison, Tibbitts & Co.:

| 12(1/5011) 11/101003 G CO                                                                                                  | Lbs.             |
|----------------------------------------------------------------------------------------------------------------------------|------------------|
| Bates   Stock in the ports December 31, 1869   Hold   Stock held by spinners   80,000                                      | 164,180.000      |
| Total weight of cotton in stock January 1, 1870.  Imports to Great Britain in 1870                                         | 110<br>100       |
| Total imports in three years 4,366,899,0 Less actual exports in 18:0 1bs 2:4,530,00 18:1 18:1 333,510,000 18:1 255,850,000 | 00               |
| Total exports in thres years 835,890,0                                                                                     | 00-3 531,009,000 |

-Equal to 333,400 bales of 400 bounds each, field by spinners Dec. 31, 1872, instead of 150,000 bales as given by the Liverpool brokers.

But we should not refer to this subject so soon again if we did not see that a similar error and in the same direction is being fastened upon us for this year by our friends at Liverpool, and our object was to call attention to this later development. According to the January or Annual Report for the year 1872, of the authority quoted above (Ellison, Tibbitts & Co.) the average actual weekly consumption of that year was 62.800 bales, or 22,600,000 lbs., in the whole of Great Britain, and the averaged weight of bales used was 360 lbs. The consumption of that year was the largest ever attained for a twelvemonth, and all the mills were running full throughout the year except a few weeks following the latter part of August. Now granting this to be correct, and the weekly consumption, at its highest, 22,600,000 lbs., then at the same rate for the first 17 weeks of this year the consumption would have been 384,200,000 lbs.; but for many weeks there was a reduction "estimated" (by the same authority—see their circular of March 10) "at 5 to 10 per cent" " for the whole country." Take it at an average of 6 per cent for 8 weeks, it will amount to 10,848,000 lbs., reducing the net consumption of the 17 weeks to 373,352,000 lbs. The same authority also stoles that the deliveries to spinners during the 17 weeks have been 418,563,000 lbs. Now this, we see, exceeds the actual consumption by 45,211,000 lbs; hence that amount must of necessity have been added to the spinners' stocks By the annual report referred to since January 1. their stock, January 1, was 150,000 bales, or 57,320,850 lbs. Adding the above increase, 114,458 bales, or 45,211,000 lbs. -their stock, May 10, was 264,458 bales, or 102,531,850 lbs. Or if we take the CHRONICLE figures of February 15, the account would stand as follows:

Spinners' stock, Jan. 1, '73, 333,000 bales, or 133,361,000 lbs. Add increase in 17 weeks, 114,458 bales, or 45,211,000 lbs. Spinners' stock, May 10, 447,458 bales, or 178,572,000 lbs.

As to the next four weeks, suppose we admit that the old consumption has been resumed (gradually of course, as no other supposition is tenable), until for the last of the four weeks it has reached the full rate, 22,600,000 lbs. All must allow that it could hardly have reached 21,400,000 lbs. in the first of these four weeks, when the coal difficulty was yet a hindrance. If so, we may state the average for the four weeks at 22,000,000 lbs. per week, or 88,000,000 lbs. for the period. By the tables in the May 8th circular of the same parties it appears that the deliveries to spinners in the same four weeks were 208,000 bales, of weight averaging 409 lbs., or 85,113,000 lbs. The spinners' stocks were therefore reduced 2,887,000 lbs., equal to 7,217 bales of 400 lbs. each not a very important reduction from

454,000 bales, as the stock must have been four weeks before, according to the Chronicle's figures, or, on the basis of the Liverpool Brokers' figures for January 1st, 264,458 bales. Either result is sufficient for our purpose, since the Liverpool Brokers universally (at least so far as we have seen) now claim that the stock held by spinners is only 130,000 to 150,000 bales. What possible excuse is there for such an evident error as this? If we could rely upon its being persisted in permanently, we should certainly hesitate to take exception to it. But there is no safety for us in our dealings except as we base them upon actual facts. When our friends in Europe have covered their present losses at the smallest possible figure, there is no certainty at all that they will not wake up some fine morning and discover and announce that they have more cotton than they imagined, and more in fact than they know what to do with. If this invisible stock is there, we prefer that our readers should know it now than then.

# FINANCIAL REVIEW OF THE MONTH OF MAY.

Several events of unusual interest in financial circles transpired during the month of May, both at home and abroad, among which may be included the final restoration of ease to our money market and the improvement in bank reserves; an advance in Government bonds to the highest point since the memorable Black Friday; a weakness and downward tendency!in stocks; a considerable advance in foreign exchange; and the advance in the Bank of England rate to six per cent, occasioned in part by the panic on the Vienna Bourse. At the close, a quiet feeling prevailed in the different departments, and Wall street appears to be settling down towards the usual Summer dullness.

The month began with a stringent money market and higher rates for call loans which were marked up to ‡ per cent per diem. This was owing to the preparations of the banka and other corporations for the payment of May interest, dividends, &c., assisted by the manipulations of operators in atocks interested on the bear side of the account. The stringency was not long maintained, however, for the disbursements of gold and currency, and the large influx of currency from the country, soon had a telling effect. Since the first Monday in the month the general rates have been 6@7 per cent, with exceptions as high as 7 gold, and as low as 3@4 per cent. Large amounts of paper were placed early in the month—consleting largely of dry goods and railroad paper—resulting in a clearing away of paper which was pressing for diacount and a consequent decline in rates to 7@8 per cent, at which the market closed.

The bank statements were favorable, with only one exception, and from a deficiency of \$309,275 in the 25 per cent reserve required by law, at the close of April, the banks at the end of May held an excess of \$4,918,400.

There was an extraordinary demand for United States bends and large amounts were taken for London account. Prices consequently ruled high, and this fact tempted sales by moneyed corporations and attracted small lots to this city from various parts of the country, but the offerings only partially supplied the demand. The unsettled state of affairs in the foreign markets had but a brief effect on prices, and the eventual result of the Vienna panic will probably be to strengthen still further the general confidence in our Government bonds.

Railroad bonds were, generally speaking, firmer on a mederate business. The most notable fluctuations were in the Union Pacific securities, which declined over 14 per cent for incomes and 7 per cent for land grants. The first mortgage bonds were comparatively steady. The decline was precipitated by the suit commenced by the United States against this corporation and the Credit Mobilier.

The leading feature of the stock market, taken as a whole, was depression and lower prices. First the suspension of the Atlantic National Bank had a weakening effect, and during the "bear" pressure on the market, several failures of stock houses of respectable standing took place. This was soon followed by the reported inability of the then leading spirit in the Pacific Mail direction to meet his engagements; and the succeeding week was memorable for the flurry in Vienna and depression in other Continental cities These combined influences were taken advantage of by the opera. tors for a decline, and at times the sales summed up a large aggregate. The ease in money did not help the bulls, as those speculators who had been carrying stocks for some time, in the hepe that lower rates of money would stimulate an upward movement, became disgusted with the persistent weakness of the market and sold out at the best prices they could obtain. The most notable fluctuations were in Pacific Mail and Union Pacific. The former ranged between 571 and 394, and was specially affected by reported fluancial troubles of the company. A new board of directors has been elected and the annual exhibit given to the stockholders, the statement being considered too indefinite to be favorable. Union Pacific declined from 324 to 254, owing to the reasons given as applying to the honds.

The following table will show the opening, highest, lowest and closing prices of railway and miscellaneous stocks during the months of April and May:

The gold speculation, under the weight of heavy disbursements at this centre, was weak at the commencement of the month, and the price declined to 115%. The foreign advices were also favorable, and the strength of securities at London gave the market a weak appearance. The declining tendency of the price led to considerable sales of gold for future delivery, and in addition to this element the merchants deferred payments on goods imported. owing to the dull condition of business, and therefore also stood short of gold. This was made the basia for an upward movement, and when the troubles in Vienna occurred the gold cliques succeeded in marking up quotations to 118\$ towards the close. Reports were freely circulated that a corner in cash gold would take place, and fear was experienced on this account, but they roved to be unfounded. Early in the month some gold was received from London, but the bank of England speedily advanced ts rate of discount from 4 to 6 per cent, in order to attract gold rom this side, and to check any excessive outflow to the continent.

COURSE OF GOLD IN MAY, 1873.

The sterling exchange market opened weak and lower, and under the flurry in money at the beginning of the month, the large produce exports to Europe, and the increased demand for United States bonds, the nominal rates were lowered to 108; and 109, for long and short sight sterling bills respectively. The advance in the Bank of England discount rate, however, and the unfavorable advices from Vienna were followed by an advance of over one per cent, the bankers being unwilling to draw. The rates were not maintained at the close, the demand for bills being limited, and the supply increased by considerable shipments of Government securities and exports of domestic produce.

I From our own correspondent. 1

LONDON, Saturday, May 24, 1873.

The state of the money market is again the principal feature attracting attention. Since the advance in the official minimum on Saturday last to six per cent, the money market has been extremely quiet, and as a large supply has been attracted to the capital, owing to the fact that the rate of interest for deposits has been increased to five per cent, it is at present above the requirements of the community. Hence, first class six months' bank and commercial bills have been in demand as yielding a remunerative source of investment, and consequently they have been taken at low rates. The anomalous condition of our money market may, in part, be gathered from the circumstance that while the official minimum is six per cent, and the rate in the open market for short-dated and three months' paper, 5% to 5% per cent, the holders of six months' bills are enabled to obtain accommodation at as low a figure as 44 per cent. But not withstanding this, the probability is that the open market rates will rise to the official rates eventually. As bas been said the money market is in an anomalous con dition, the advance in the rates of discount having been caused not by an active demand for money for home use, or by any adverse balance of trade, but by a demand for bullion which rates of discount are not likely in any way to effect, so long as it is on German account. The German government will no doubt pur. chase all they can pay for, and will receive any sums that may be due to them from this side in gold, so long as their coinage operations are in progress; but beyond that they cannot go, and it is evident that if they require to purchase gold, they must send us an equivalent which is acceptable to us. It happens, however, that our importations of gold are small, and that there is no prospect of any immediate increase; and this is my chief reason for asserting that rather than a decline taking place in the rates of discount, the open market quotations will advance to those rul. ng at the Bank. For it must be borne in mind that the foreign

excharges will be regulated not by the official minimum of six per cent, but by the rates "out of doors;" and as the quotations now current have not had as great an effect as was desired or was necessary, any reduction would be imprudent. In fact, so long as the Continental money markets remain firm, and the rates of discount high, low rates for money in London can scarcely be expected. Germany and France have always a large amount of their own, and of sound government stocks, upon which they are enabled to realise if our money market is chesp, and the effect of this is obviously to equalize the rates for money in the three countries.

A feature in the Bank return is that the demand for money shows a perceptible diminution, the falling off in "other secorities" being as much as £840,582, while in "other deposits," or current accounts, the diminution is £751,137. There is also a decrease in the circulation of notes; and though the stock of bullion has been reduced to the extent of £443,504, the proportion of reserve to liabilities at the Bank, which was rather more than 82 per cent last week, is now almost 33 per cent. The adverse feature in the return is evidently the diminished stock of bullion, and it is for that reason that it is not looked upon as a favorable one. The "other securities" held by the Bank, which were £28,818,207 on April 2, are now £24,860,913, showing a decrease of £3.957,294. A large falling off in the demand for money is therefore apparent. The stock of bullion which at the commencement of the year was £24 014,298, is now £20,723,048, being less by £3,391,250.

The demand for money during the week has been on a very moderate scale, and the quotations rule as follows:

| Per cent.                    | Per cent.                           |
|------------------------------|-------------------------------------|
| Bank rate 6                  | 4 months' hank bills 51/25%         |
| Open-market rates:           | 6 mouths' hank bills 434 457        |
| 30 and 60 days' bills 51/05% | 4 and 6 months' trade bille. 4x @5x |
| 3 mouths' bills5160514       |                                     |

The rates of interest allowed by the joint stock banks and discount houses for deposits are subjoined:

Joint stock banks
Discount houses at call
Discount houses with 7 days' notice.
Discount houses with 14 days' notice.

The following are the rates of discount at the leading Con tinental cities: Bank Open

Prices May 15.

The belief that six per cent, will be the highest minimum rate of discount that will be necessary, and that the Bank of England will increase in strength has given a firmer tone to the stock markets, and the advance in prices has been almost general. The transactions have been to a fair extent, and with the exception of some flatness in North Eastern railway stock, owing to the striks of the miners in the Cleveland district, hon e stocks are decidedly better. Amongst foreign government stocks the chief adverse features have been in French, which have been unsettled, though not altogether deficient in firmness, owing to the momentous events in course of settlement in the National Assembly, while Spanish have been dull, in consequence of the unsatisfactory condition of the national finances. United S ates Government securities have been dealt in to a lair extent, and have improved in value. Erie shares have, on the whole, been firm, and Atlantic & Great Western railway securities, especially the third mortgage

bonds, have improved in value. Illinois Central, however, are

\$203,703,059 \$192,551,483

Coin cer.

The following were the closing prices this afternoon of consols and the principal American securities:

| Consols                                                              | 93%@     | 94   |

| The crisis at Vienna having materially subsided hill                 |          | hat  |

The crisis at Vienna having materially subsided, bills on that city have been more readily negotiable, and there has been a fair demand for bills on other cities. The rates of exchange, taken as a whole, are rather less favorable to this country. Gold continues in demand for export, but in the silver market there has been no special feature. The following prices of bullion are from the circular of Messrs. Pixley, Abell, Langley & Blake:

| _ GOLD.                                    | e. | a.   | e. a |  |

The early part of the week was cold, and a sharp frost on oue night showed its effect upon the potatoes, but of course it is impossible to say that permanent or irremediable injury has been sustained. The last few days have been genial, with sunshine and showers, and it is hoped therefore that vegetation will recover from the effects of the late frosts. The prospect is still considered to be a good one, and there are hopes that the crop of the more common, but, at the same time, more useful kinds of fruit will be abundant. The crop of hay looks as if it would be large, as we have had no forcing Spring weather to draw up the rank grass, and smother the bottom, or finer kinds.

The trade for cereal produce during the week has been firm in tone, though presenting at the same time a quiet appearance. Fine English wheat has realized an improvement of 1s. per quarter, and foreign kinds bave changed hands at extreme rates. The scanty supplies offering on the Continent, and the fact that foreign buyers have appeared in our markets, naturally induce holders to be very firm in their demands. There is, however, a large supply of grain afloat, and though it is by no means in excess of European requirements, yet it leads millers to operate

The public sales of colonial wool have been progressing with fair spirit, so far as Australian wools are concerned, and greasy Adelaide produce has been in request on French account. Half bred wools, however, are dull, and are 2d. to 3d. per lb. lower than at last sales, this description of wool having been largely affected by the large supply of South American produce which has of late been brought forward at the Antwerp sale.

The French cable has been repaired, and the directors of the two Atlantic Telegraph Companies aunounce a return on the 1st of June to the old tariff of 4s. per word.

The following figures show the imports and exports of cereal produce into and from the United Kingdom since harvest, viz.: from September 1 to the close of last week, compared with the corresponding periods in the three previous years:

|             | IMPORT     | rs.        |            |            |
|-------------|------------|------------|------------|------------|

The Grand Trunk Railway of Canada has announced an issue of £7,500,000, of new ordinary stock, being part of an authorized issne of £10,000,000, the balance, or £2,500,000 being reserved to be issued at the discretion of the directors, but not sooner than January 1st, 1875. The price of issue is £32 10s. for £100 stock, and the last instalment is payable on the 1st of January, 1875. The object of this issue is to carry out a plan of reorganization by which the railway will be placed in a position to develop the traffic existing on the line, and to bring the undertaking into first-class working order. The traffic on the line is annually increasing, the receipts which in 1870 were £1,498,307, being for last year £1,836,057.

# COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show a decrease in both dry goods and general merchandise. The total imports amount to \$6,515,921 this week, against \$8,585,218 last week, and \$7,938,263 the previous week. The exports are \$5,396,442 this week, against \$5,205,204 last week, and \$5,482,894 the previous week. The exports of cotton the past week were 9,783 bales, against 15,216 bales last week. The following are the imports at New York for week ending (for dry goods) May 29, and for the week ending (for general merchandise) May 30: merchandise) May 30:

WHITE STAR LINE SUCCESSFUL. The Postmaster General heard on Thursday the statements and arguments of Messrs. J. H. Sparks and J. S. Gartner, agents of the White Star steamship line, and also the opposing arguments from representatives and agents of the other competing lines. At the conclusion of the arguments Postmaster General Croswell expressed the opinion that it was his duty to take an equitable and not a strictly legal view of the matter in controversy, and that it would not be fair to annul the existing contract with the White Star Company on account of accidents which human skill and foresight could not wholly prevent, unless it were shown that the line had been so wholly prevent, unless it were shown that the line had been so crippled by them as to be unable to perform the requisite service in future, which had not, in fact, been shown. The White Star Line had been awarded the contract last October, on account of its superior speed and with full knowledge of the number of its vessels, all of which had been provided for. The service, as stipulated, and the losses since sustained would be more than replaced in a short time by the steamships Germanic and Brittannic, which are to be larger and faster than any yet launched. In view of all these considerations, the Postmaster-General said he must refuse to abrogate the existing contract with the White he must refuse to abrogate the existing contract with the White Star line.

TIN.—The immense quantity of tin used in this country comes from the Straits of Malacca and England, the bulk of it being imported from the former place. Of the Malacca tin there are two qualities—"Banca" and "Malacca," or "Straits." "Banca" tin comes from the Dutch settlement of that name, where it is manufactured under the supervision of the government, whose stamp it bears, and it commands the highest price. "Straits" tin comes from the same locality, but as it is manufactured by private comes from the same locality, but as it is manufactured by private companies the quality is not considered so good. All pure tin is brought out in slabs, and most of the supply for this country is imported direct to New York and Boston. It is extensively used in the manufacture of brass and for numerous other purposes. A In the manufacture of brass and for numerous other purposes. A very large percentage of English tin imported to this country is in the form of "plates." It is mined at Cornwall, Wales, and from there sent to the manufactories in the vicinity of Liverpeol, where it is prepared for export. There is nearly \$60,000,000 capital invested in this business, and about one half of the trade of the United States in tin is controlled by Messrs. Phelps, Dodge & Co. of this city, whose works are at Pontymister, in Wales, near Newport, Scotland. They are also the owners of the well known Ansonia Brass and Copper Co., in Connecticut, founded thirty years ago, and incorporated about five years since. thirty years ago, and incorporated about five years since. At the present time the market is very quiet and dull, the prices in gold per lb. ruling as follows: For Banca, 37c.; Straits, 31½c.; English, 31c.; Billton, 31½c.

—Mr. A. C. Kaufman, banker and broker, No. 25 Broad street, Charleston, S. C., says in regard to the Port Royal Rullroad, of which he is the financial agent at that point: "It seems only necessary to say that the Port Royal Railroad bonds are the security of a company so closely linked with the interests of that powerful corporation the Georgia Railroad & Banking Company, that it may be regarded as part and parcel of it. These roads also virtually control the Savannah & Charleston Railroad the combined length of the three being about 400 miles. It is the combined length of the three being about 400 miles. It is probable ere long that they will be operated under one head. For shrewd financial management and honorable and conservative administration of its affairs, the Georgia Railroad stands second to none in the United States. Its business is increasing year by year—the report for 1872-73 showing larger receipts than ever. It pays regular dividends of 8 per cent upon its capital stock—placing always a large proportion of its annual earnings to its sinking fand."

—Attention is directed to the card of the Texas Banking and Insurance Company of Galveston, in our advertising columns. R. S. Willis, Esq., is now President; Robert Mils, Esq., Vice-President; Alphonse Lauve, Cashier, and S. H. Klmball, Assistant-Cashier. The capital has been increased to \$300,000.

-The attention of the readers of THE CHRONICLE is called to the usual card in another column of General Edward W. Serrell, the usual card in another column of the elevant W. Serrell, Civil Eogineer. He gives particular attention to the examination of public works for capitalists seeking investments, as well as railroads, bridges, explorations, &c., &c. General Serrell, who is the inventor of "Serrell's Patent Wrought Iron Viaducts," has his office at No. 78 Broadway, in this city.

# BANKING AND FINANCIAL.

# \$5,000,000

TOLEDO. WARASH & WESTERN RAILROAD CO.28 SEVEN PER CENT MORTGAGE BONDS.

PRINCIPAL AND INTEREST PAVABLE IN GOLD COIN. Issued for the purchase of steel rails. Principal due 1893. Interest coupons

payrible February 1 and August 1 in the City of New York.

The Directors of this Trunk Line, between Toledo and St.
Louis, comprising with its branches over 600 miles of completed decided, in order to accommodate the great increase of traffic, to relay the ENTIRE LINE WITH STEEL RAILS; and for that purpose have issued \$5,000,000 of 7 per cent Mortgage Gold Bonds.

The steady increase of business over this line will be rapidly and greatly augmented by its connection with the Canada Southern Railroad (which will be open for traffic in a few weeks), rendering the substitution of steel rails a necessity.

The net earnings for the year 1871 and 1872, after paying the interest on the Mortgage debt of the Company, were largely in excess of the amount necessary to pay the interest on this Mortgage. Mortgage.

The road has no floating debt. All the proceeds of these Bonds go to the permanent improvement of the property, experience having proved that by substituting steel for iron rails on roads doing so heavy a traffic, the "saving" alone, without any allowance for increase of business, is sufficient to pay off at-least four times the amount of this Mortgage before maturity. The advantage of employing steel rails is so great that all our

Trunk Lines are adopting them, to the exclusion of iron ones.

As the Bonds will only be issued as fast as the rails can be laid, we now offer for sale but \$1,000,000, AT NINETY, AND ACCRUED INTEREST IN CURRENCY.

The large earnings of this road, with its future prospects, make

this Bond, in our opinion, an undoubted security.

WINSLOW, LANIER & Co., 27 Plue street. PERMINS, LIVINGSTON & POST, 21 New street.

# BANKING HOUSE OF JAY COOKE & CO.,

No. 20 WALL STREET.

New York, May 27, 1873.

The Northern Pacific Railroad Company having determined to close its 7-30 First Mortgage Gold Loan at an aggregate not exceeding thirty million dollars, and thereafter to pay no higher rate of interest than 6 per cent. on further issues of its bonds, the limited remainder of the 7 3-10 loan is now being disposed of through the usual agencies.

As the bonds of this issue are made receivable in payment for the Company's lands at 1.10, they are in constant and increasing demand for this purpose, and will continue to be after the loan is closed-a fact which much enhances their value and attractive ness as an investment.

The Company has more than 500 miles of its road built and in operation, has earned title to nearly ten million acres of its land grant, and sales of lands have thus far averaged \$5 66 per acre.

All marketable securities are received in exchange for Northern Pacifics at current rates.

JAY COOKE & CO.

# BANKING HOUSE OF FISK & HATCH, 5 NASSAU STREET.

NEW YORK, June 6, 1873.

We recommend to our friends and customers for investment of surplus Capital, or in exchange for Government Bonds. which can now be sold at unusually high prices, the following Securities of well-known character and established reputation

THE CHESAPEAKE AND OHIO SIX PER CENT BONDS, principal and interest payable in Gold Coin in New York City; interest payable May 1 and Nevember 1; issued in denominations of \$100, \$500 and \$1,000, either Coupon or Registered. Price SS 1-2 and accrued interest.

Also, the CHESAPEAKE AND OHIO SEVEN PER CENT BONDS, principal and interest payable in gold coin in New York City; interest payable January 1 and July 1. Bonds of \$1,000 each, Conpon or Registered. Price 90 and accrued interest.

The CHESAPEAKE AND OHIO RAILROAD is completed and in operation from Richmond to the Ohio River, 420 miles, at a cost, with the equipment, of over \$35,000,000, and the rapid development of the business of the Road indicates that its earnings for the ensuing twelve months will not be less than \$3,000,000, and for the succeeding year not less than \$5,000,000.

Pamphlets containing full information concerning the Road and the country it traverses furnished on application.

We also deal in Government Bonds, Central and Western Pacific, and other first-class Securities; receive deposits on which we allow four per cent interest; make collections, and do a general banking tusiness.

FISK & HATCH,

# Banking House of Henry Clews & Co., 32 Wall street, N. Y.

FRIDAY, June 8, 1873-6 P. M.

The Money Market and Financial Situation ... Financial affairs have remained very quiet throughout the week, so far as our home markets are concerned, and the only event of importance was the advance of 1 per cent in the Bank of England rate which was cabled on Wednesday, making the present bank rate 7 per cent. A daily paper of this morning also contains a dispatch dated Londor, June 5 (Thursday) as follows:

"It is alleged in the city this evening that the government has decided to authorize the Bank of England to increase its circulation £6,000,000 sterling under restrictions not yet determined.

The meaning of this dispatch was much discussed to-day, and up to a late hour there were no private telegrams either confirm. ing or explaining the previous report. The bank has recently continued to advance its minimum discount rate, which May 7 was 42 per cent, May 10 5 per cent, May 17 6 per cent, and June 4 7 per cent, with the usual object of preventing an outflow of Ther cent, with the usual object of preventing an outflow of specie, but thus far with indifferent success, and it is supposed that the Peel Act of 1844 limiting the circulation to £15,000,000 may have been suspended as it was in 1866 at the time of the failure of Overend, Gurney & Co. The decrease of bullion in back the past week was £215,000. Specie in the Bank of France shows an increase of 2,750,000 france was made. payment of 250,000,000 of francs was made.

The local money market has continued very easy at 4@6 per

cent, and at times it has been difficult for lenders to place their balances even at the lowest rate named. Commercial paper is in balances even at the lowest rate named. Commercial paper is in good demand, but with small amounts offering, and the rates show a tendency to decline still further; although some very choice paper has already been negotiated below 7 per cent, the current

quotations for prime names being 7@7½ per cent.

The last weekly Clearing-House statement of New York city banks, rendered May 31 showed an increase of \$846,925 in the excess of reserves above the legal requirement, the whole of such excess being \$4,918,400. The total liabilities stood at \$235,583. 600, and the total reserves at \$63,814.300.

The following statement shows the changes from previous week and a comparison with 1872 and 1871:

|                |               | 1873          |      |             | 1872.         | 1871.         |

United States Bonds.—The market for Government securities continues to show the same leading feature which we have frequently noticed of late, namely, the strong purchasing movement on the part of buyers for the London market. At every favorable turn in the relative prices of bonds, foreign exchange, and gold, these bankers step in and take all the Government bonds of the favorite coupon issues which they can obtain at the moment, and these purchases loot up a large amount during the course of a week. This remarkable confidence shown in the excellence of United States bonds, recently developed among English investors, has much significance as an indication of the English investors, has much significance as an indication of the feeling there, in regard to the resources and finaucial integrity of this country; and it is not without force in suggesting the possibility of a permanently higher range in the gold prices of U. S. securities. This month the Treasury purchases will be only \$500,000 on the 4th and 15th, or \$1,000,000 in all. At the first purchase, Wednesday last, the total offerings were \$946,700. The Secretary of the Treasury issued a circular today calling in \$20,000,000 more of five twenties of 1862 to be paid September 6, viz.: "This will make \$70,000,000 of 5-20s converted thus far by the 'Syndicate' into new five per cent bonds. The following is a list of the numbers and denominations of the bonds called:

State and Railroad Bonds.-The business in State bonds has been qu te small. Tennessees have yielded a little further in prices, and South Carolinas continue depressed under the report that some \$6,500,000 of their later issues of bonds were illegal. It is said that the Governor of Tennesses will soon be in this city to make arrangements for funding under the provisions of the recent law, and strong efforts will be made to induce him to have the funding operations carried on in New York, as that would be greatly for the convenience of a large majority of the bondholders.

despatch from Louisiana says that the funds to pay the January and February coupons were on hand at the fiscal agency in New Orleans yesterday, and would have been disbursed except for an injunction, which it is believed will soon be disposed of so that the payments can be made. In Virginia a strennous effort is to be made to have the old unpaid taxes collected in, which amounts in the aggregate to a large sum, and this may create a demand for coupons.

For railroad bonds there has only been a moderate demand,

and sales of old conds at the Exchange are widely distributed among the numerous issues, but are generally of small amounts except in Uniou Pacifics, which have been dealt in more largely. There has been a material recovery in the prices of latd grants and incomes, and holders are beginning to take a more hopeful view, thinking that it is hardly possible that the United States Government will prosecute its suit to the injury of bons-fide holders of these bonds.

Closing prices daily, and the range since Jan. 1, have been:

* This is the price bid, no sale was made at the Board.

Railroad and Miscellaneons Stocks .. The stock market has been very quiet, and at times the general list was almost entirely neglected, and the small amount of business done was limited to a few specialties. Several of the most prominent operators have been absent at the West attending the annual elections of leading railroad companies, and in their absence little is done in their favorite stocks. Pacific Mail has been an exception to the general dullness, and transactions in this stock have been large. The chief point of interest since the new board was elected has been in regard to the fivancial condition and earnings of the company, and it is now said that the new board will issue soon a more complete statement, exhibiting the actual condition of the company's affairs. Union Pacific has recovered a part of its decline, since the first excitement concerning the Government sult has passed away. The traffic of this road in April, and since Jan. 1, has been as follows:

| April, 1873.<br>Earnings \$881,266 38<br>Expenses (incl. \$01.000 | April, 1872.<br>\$741,802 56 | Jan. 1 to<br>April 30, 1873.<br>\$2,605,281 32 | Jan. 1 to<br>April 30, 1872,<br>\$2,115,715 17 |
|-------------------------------------------------------------------|------------------------------|------------------------------------------------|------------------------------------------------|

| Net earnings \$407,187 54                                         |                              | \$1,159,806 76                                 | \$590,952 95                                   |
| Increase gross earnings                                           | \$139,463 82<br>51,382 72    |                                                | \$489,566 15<br>568,854 61                     |

Ohio & Mississippi weakened on the report of an unauthorized issue of stock or bonds, though it appears that the bonds are authorized, and are issued to lay steel rails.

At the close prices were weak.

The annual election of stockholders of the Chicago, Rock Island is Perifer Pailrond Company for the fire discovery the standard of the Chicago, Rock Island

The annual election of stockholders of the Chicago, Rock Island & Pacific Railroad Company, for five directors whose terms have just expired, was held on June 4, at the company's office to Chicago, and resulted in the re-election of the old directors, as follows: John F. Tracy, Chicago; David Dows, New York; Hugh Riddle, Chlengo; Wm. L. Scott, Erio, Penn.; B. F. Allen, Des Moines, Iowa. One hundred and forty-six thousand, three hundred and forty-one shares were represented. At a subsequent meeting of the directors, the following officers were re elected: President, John F. Tracy; Vice-President, Hugh Riddle; Secretary and Treasurer. E. H. Tows. The following statement shows the operations of the road for the past year: Receipts from passengers and freight, \$6,419,231 26; interest, \$237,819 41. Total, \$6,657,050 67. Operatiog expenses, \$3,253,344 91; taxes and legal expenses, \$264,438 58. Total expenditures, \$3,587,783 49. Net earnings, \$3,139,267 18.

Th Gold Market .- The gold market has been rather quiet and firm. The Treasury sales for June are to be large, including a together \$7,000,000, and dishursements are also being made on actogether \$7,000,000, and dishursements are also being made on account of five-twenties redeemed, but notwithstanding this large supply there has been no evidence of weakness in the price, and the clique still seem to hold on with confidence, and have been assisted to some extent by the foreign news previously referred to. On Thursday the Treasury sold \$2,000,000, the bids amounting to \$6,735,600. On gold loans the rates to-day for carrying were 5, 4, 6 and 3 per cent. Customs receipts of the week were \$2,209,000. \$2,209,000.

The following table will show the course of the gold premium each day of the past week:

Foreign |Exchange .- The principal feature in exchange has been the increased firmness in rates, arising from the advance in the Bank of England rate of discount on Wednesday, and the discussions to-day in regard to the dispatches speaking of an increase of £6,000,000 in the bank circulation. The effect has naturally been most marked in the price of short sight bills, prime sterling heing quoted to day at 109½ and 110½ respectively for long and short bills, with a concession of an ½ on actual business. Nominal quotations are se follows: nal quotations are as follows:
